UI Prototype

1. User Interface and Description

1.1 Home screen:

- **Description**

Purpose:

- This is the main page of the application. It shows all **featured videos** and **ongoing streams**. Next to it is the **navigation bar** to the stream section, the user's profile.
- On the right corner of the screen will be the Login box if the user wants to personalize his experience or start broadcasting the stream to everyone.

How users can use it:

- This screen is visible to all users when they click on the site link. Users can interact to search for public streams and hot streamers. Then you can click the “**Log in**” button to subscribe to the channel as well as turn on notifications, and comments...

1.2 Register screen:

- **Description**

Purpose:

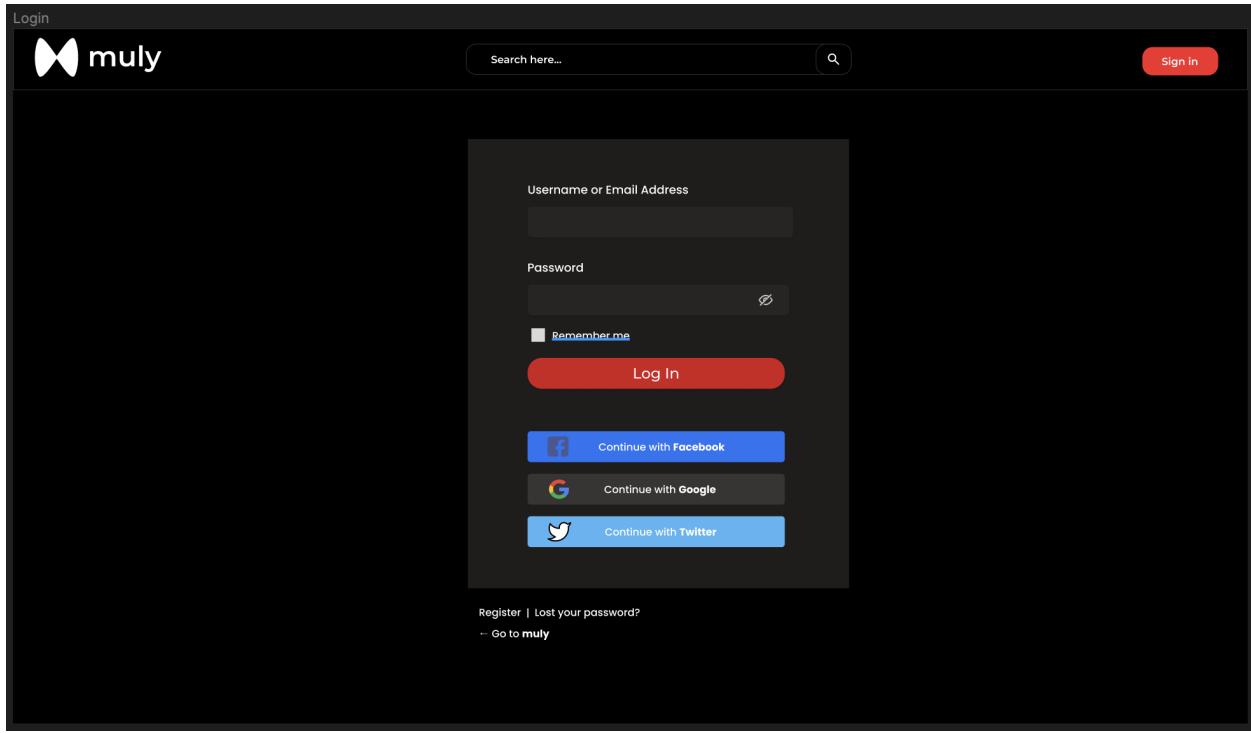

- When the user does not have an account, they will click on the **Register** button to show the interface like this. Here the user will provide a Username, Password, and Email Address to create an account on the system.

How users can use it:

- Users need to click the Register button and enter information into the available text boxes. After completing, you will press the "**Submit and Confirm**" button to finish registering a new account on the system.

1.3 Login screen:

- **Description**

Purpose:

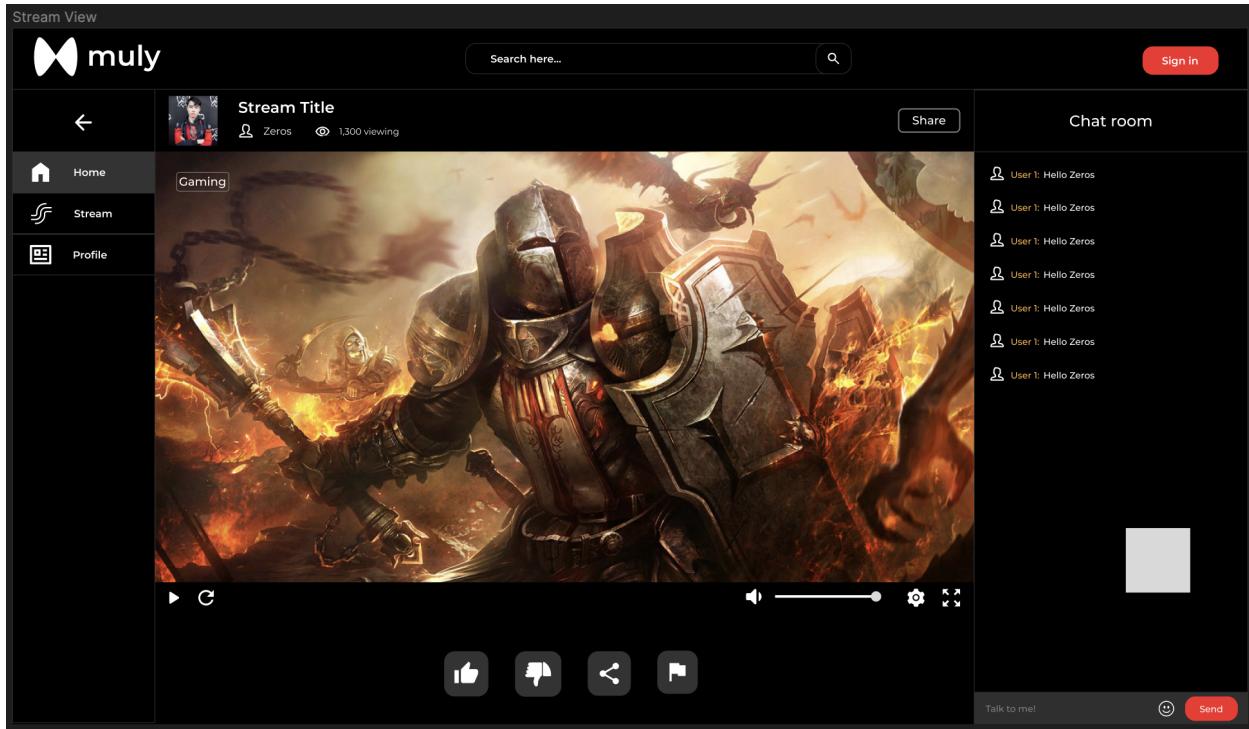

- This is the login screen to the application, it asks for the user's Username and Password information. There are also options to sign in with the link via Facebook, Google Account, and Twitter.

How users can use it:

- After the user clicks the login button on the previous screen page, the system will lead to this screen. Users need to enter their Email and Password, then click the "**Log In**" button to proceed with login. Or they can log in through an existing Facebook, Google, or Twitter account.

1.4 Stream view:

- Description

Purpose:

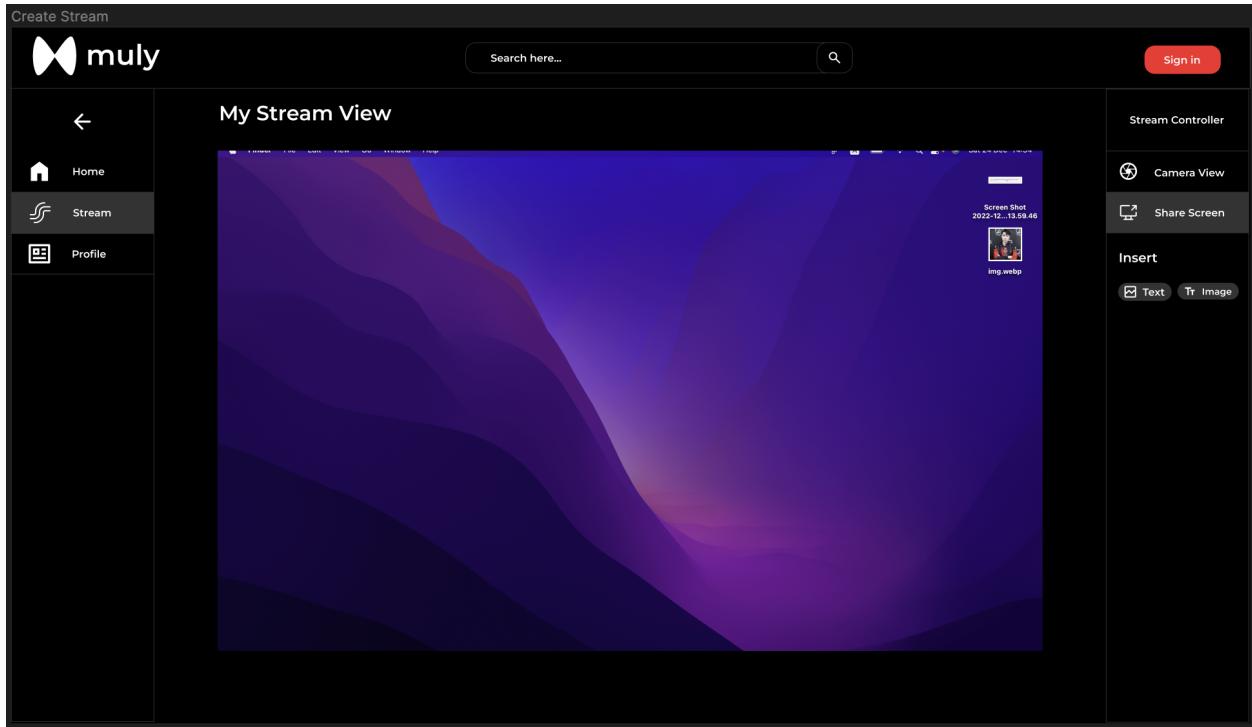

- This is the screen after the user clicks to view any stream. The center of the screen will be when the main area for viewing. There are buttons to adjust the volume, like/dislike videos, magnify the screen, and some **other settings options**. On the right corner of the screen is an area for users to **chat online** with other users and streamers who are streaming.

How users can use it:

- After clicking on any stream, users can watch, set parameters for the video, enter the **chat box** and chat with others who are watching, temporarily use the video, continue watching or switch to another video.

1.5 Create stream:

- Description

Purpose:

- This is the screen that only the Streamer account can use. The image above is an illustration of that streamer streaming their home screen to viewers. In the right corner, there are options such as projecting the **streamer's camera**, and inserting text or images attached to the stream.

How users can use it:

- After logging in with an account with the role of Streamer, they will choose the option to **Create New Stream**. Then, they will proceed to share the screen, share their camera (if desired), and perform the actions and accompanying effects while streaming as mentioned above.
